A. M. GORTON. PINANCIAL EFFECT OF THE ELEC-TION.

Let Every Tax-Payer Read This, In the heat of a political curvass, the victory is apt to engross the thoughts, so, much that the real and substantial consequences of the rictory, which soever way it may turn, are not duly considered. It is not merely to have the pleasure of a huarra for our sale, it is not merely to place our candidates in office, that we desire and labor for a Republican victory on the 9th inst. The election derives its main importance from the fact that it will show what is the mind of the majority on questions of great practical impor-tance, not only to the community at large, but

to every individual in it.

To thinding this, let us ask what was the reason that the continuous were so desired on Monday with the erroneous amounteement concerning the travestop determs in Connecticut? And what brought down then thus on Thursday, when the error was corrected by the news that those elections had resulted in targely increased Republican majorines? It made no difference here, nee hundred miles away and in monther Satu, whether Mr. Jones of Mr. Smith was chosen both outster or two clerk in Saybrook, Conto every individual in it. State, whether Mr. Jones of Mr. Smith was chosen path musier of town cleek in Saylmosk, Comerteed, or whether their distinguished opponents were chosen. But it shows the menting relations of the grand Republic in does of the townships of the State. It shows the uncirn prevaience of the grand Republic in does of the townships of the State. It shows the uncirn part of the auton, and that people take the opportunity to express it as a training of their public mand addressed in its universal triumph.

So our election on Tanaday has the same significance, in addition to the purpose of plating the discondant condition of the country, and, or comes, will have us hallounce the death of the discondant condition of the country, and, or comes, will have us hallounce and business, money in ritery, wages, enterprise, layes, etc. We canned, in this article, go late all the details of this interesting and himportant sub-

country, and, of course, will large as inflaence on business, money in afters, wages, enterprise, taxes, one We cannot, in this article, go into all the details of this interesting and important subject. But let us take the single item of the public the details of the minersting and important subject. But let us take the single item of the public the thir. The mononiment to the Constitution where is proposed seemes the payment of the debt, by your peraltential of the payment of the rebot debt. This succulment is virtually the Republic in plantary in the present electron. Those who whe against the Republican party where really, though they may not intend by for the payment of the rebot debt, which is not less than twenty the hundred utilition doubt so.

Now, see what would be the effect on individuals. This augmentation of the public do be would be equal to doubling it. Then in the lists of the trees would have to be extended to an indefinite unable of years; and in the second place, the wine of the Government bonds to the individual holder of them would be greatly diminished. Further, the certainty of heavy and perpetual taxation, would by peed all real estate, and embrace all kinds of business cutal prises.

This, however, is not all. If Congress is not

tainty of heavy and peleptual tabution, volume deprecial all real estate, and embases all kinds of business entaiprises.

This, however, is not all. If Congress is not sustain all it is action, by the voice of the people at the ensuing election, a large ethin still for the destruction of rebel property in the war and nor the value of the slaves remanerpated, will be brought angulass the Government, amounting to three thousand million dollars mote. This will moster moster age of taxes largely lacreased. It may be said that this cannot be done. But it only requires the Pesident's publy to be adopted and pearled into effect, for make the normous iniquity a moral ectainty. Give the botthern States the power in Congress, and they will certainly do this very thong It is but human nature to do it, and their human nature to do it, and their human nature is no better than the average.

The sum of the matter them is, fellow entirens, you will have to pay as you vote. If you wish to pay the tubels for rebelling, if you want to bear your heavy favorion, which, with only your way deep will see the graph of the repels for rebelling, if you want to be a your heavy favorion, which, with only your way deby, will act that a lew years, and jess if over as a mortrage on all your property to your epitides a mad it your wish in addition, to be, sub-

own debt, will last but a lew years, and poss it over as a morteage on all your property to your children, and it you wish, in addition, to be subject to Southern dictation in the Government, core the Anti-Republican tasket; but it you wish every doll it paid of the debt saddled upon us by the rebest, as the necessity of definiting the government, and no rebel dolt, incurred in attempting to destroy it, cote the Republic in tleket — Pittsburgh Commercial.

The Famine in India.

Sucker Rods, sab stores in the cures—"crawling" from Calcutta (August 16) correspo

There are sights to be witnessed in Calentra which would lead the stranger to believe that the city was perishing with famine, and peal-lene. Since the famine has been allowed to attain such hidgons proportions in the rural district it is immediating the capital. All who causast from the fluction, from the afflicted subdisison of Jehn bod, in the rich country of Hongly, and the misery of what was once the fluorishing indigo district of Nuddel, as well as from the more weekerd Midnapore and distant Orissa, dock to the charilles of Calentra. They would create food at their own homes, but they hear dock to the chalitles of Calentia. They would receive food at their own homes, but they hear that they will get more in Calentia, and clothes well, and so at the present moment, no less than two hundred and fitty famine stricken weekens a day seek the unmachatters. Bengulee feeding houses of the native quanter of Calentia. So late as the 9th of July list the Bengal Government a second time refused to encourage the formulon of a public relief committee, and soon refred again to the fills.

But the city was being so crowded with han-

again to the hills.

But the city was being so crowded with paupars, a pastience was go imm net t that the faunicipial commissioner, Mr. Smart Hoge, and one or two merchants organized a committee, and on Monday last a public meeting of all classes was held in the town half to raise subscriptions. Monday has a public meeting of all classes was held in the town half to take subscriptions. Indiges, merchants, barristers, chaplains, and remanders urged the claims of the starving, and enlagized the charity of the native gentlemen, who had already done so match, with an elequence hardly required, but quite justified. Official reports were read giving statistics which, completed to date, show that at twenty-two places 17.45 poor are duly led, in addition to the sick in the hospitals, and as this number is increasing by about 250 a day it may be said that 20,000 starvelings are now subsisting on charty daily in Calentia. A sum of £150,000 is required to grapple with the misery, and of this within four days of the meeting bulng hold more than one-half has been ambartised.

cyldones that the depth and extent of the calumidate dissolved and the members rec ity were wholly mappinedated." -- Any repre-

"We were an orised as weeks and months passed and no movement was originated by the proper authorline." To the question whather relief ponetrates into the interior from the sation, he says it does not "to the extent that is desirable," although all the officials and non-officials work with prateworthy energy. The mortality from choiera he describes as "or rejeffed magnitude, as "much greater than has generally been supposed." And there are still "four long dark months" before the province. Government is malting over the many orphinis to the missionaries" care. This is said of Cuttack, but I am told by a high official who has just returned from B. aspore, where he needsted the reheat committee, that language would full to describe the state of things there a few weeks ago. Think of uline hundred dead bodies being pleked up in the streets of Balasore in one morning but Think of time immerial case to do sees being pieces up in the streets of Balasore in one morning. Yet this happened he assured me. Ilait the truth has not been fold, and as there is no Baird Smith three will never be reported. The best equirit from Bainsore shows even hundred and three deaths in that one little station in the week ending July 21; and if you treble that neighbor the truth is trucked and the contraction are who becomes the fixed of week ending July 21; and It you trable that number for the many who become the food of the judgal and the value in the bonely jungle or dirch you will not go beyond the sad truth. It is ominous that the Band of Revenue has cassed to report deaths

From the New York News.

The stranger in New York Jooking upon the unsuffled expanse of the upper erust society of the cosmopolis, would scarcely imagine that beneath its surface so many strage evants are constantly occurring and carlous incidents developing that afford the initiated fond for months of endless gossip. The latest phase of i strionable manetering has brought to light the existence of a cotern of enterprising young gentlemen, some of whom, employed in ever departments, while others, seathered throughout the various grades of metropolitan society, have organized themselves into a Martinonial Glub, with a certain Mr. C. as Chairmon and Mr. C. as Secretary, with the avowed object of securing rich wives for the members of the Club. The range of this matrinonial organization is not confined to my special quarter of the metropolis, but extends its operations from New England to the law West.

Those members of the Club, who, in thermally avocations or in society, are introduced to residence; whether an ophism or if with parents, whether latther or mother, or both, are living the number of bothers and distens, wealth of pretrict portion. The result of those inquiries are parently noted in the books of the Secretary somewhat in that ashoot:

MATCHES MAINS.

A number of very excellent marriages have been made by the matriagental total. One handsome, impudent young fellow, well known about rown, not worth a direct male by the threads, recently married a young lady with a fortune of \$150,000, and, then a returned, cut all his old associates, and is now providing at the head, and transacting the business of, his grandmother-in-law's family, with all the gravity and dignity of an old expert. A LAST WORD.

It rests with the honest and incorruptible Republican Union electors of Titusville to de teat the Copper-Clymer party so overwhelming; at the pulls, to morrow, that it will require affi darlts to prove that there was ever a Dark-Lan tern Club in existence.

Remember that in voting the Republican Un

ion ticket, you vote in condemnation of the Rebellon; in abhorrence of the New Orleans mis wiere; in rejection of Johnson's infamous policy of restoring unpardoned Rebels to power; in regulation of the rebel debt; in support of a loyal Congress, and for the reconstruction of the Union upon the basis of equal rights for both North and South. Let us then roll up such a majority on the side of FREE LABOR and DIMINISHED TAXA-

Tion as will send a thrill of joy and gladuess to the heart and home of EVERY HONEST, HARD WORKING MECHANIC and LABORER in the offregions.
This CAN BE DONE, and we have faith enough in the Republican Electors of Titusville

to believe that H WILL BE DONE! To accom-plish this, however, we must WORK. The first thing to be done, is to VOTE EARLY!

Nothing helps the working men at the polls on much as to see their friends early on the spot. it relieves committees of an immense amount of anxiety, and leaves them at liberty to direct their attention to the aged, the infirm, and doubtful

It will be perfectly safe to CHAL-LENGE EVERY MAN NOT KNOWN TO BE

A VOTER. No honest near will complain of DON'T WRANGLE! even with those who may attempt to play the trained, but WeRK for the WHOLE TICKET! So shall a glotious trimaph reward your efforts, and Thraville be pixed in the food mak of the Republican phalanx of Eistern Grawford, which shall march to an assured victory over the apolo-

gists for Tracement Rebellion! FORWARD IS THE WORD!

Keep It Before the Tax-Pavers That a ratification of the Constitutional Amendments depends on the election of a Republican Legislature. One of these amendments provides for the repudiation of the rebel debt. If the amendments are not ratified it follows that the rebel debt will not be repudiated. The next step, after the failure to repudiate that field, will be to secure its payment. This payment will not and annot be made by the late slave States. It must be assumed by the national Government, and will become a burden on the people of the free States. These are facts for all voters. A vote now will betraktee present a mortgage, to miso money to pay rebel debts, from being faid on overy loyal man's home. Mechanics and workagain of Thusville, consider these undentable

Grant Boos Not Support "My Policy." The Detroit Post makes a strong point when it says that General Grant's letter to Colonel Hillyer, of New York, was a scathling rebuke to Johnson and Seward, who have both repeatedly intimated that he (Grant) was in favor of "My Polley." Says the Post: "General Grant could not rabuke tils superior officer, but the moment he caught a public men not his superior in rank he came down on the falsehood as he pounced upon Leu's broken hosts at Petersburg, thus hitting the President and his Secretary a terrible blow, over Hitlyer's shoulders. We quote the paragraph to which we have referred; "They (meaning the l'unsalans) knew-which comes much to the same thing,—what they were gighting about; they had a strong sense of duty; they wore steady, orderly, God-learing men. All testimates of the min I have yet seen seem to me to leave out of sight the power of what I may you may call the religious element of the Prussian army. You may call it superstition, or bigotry, or faint-leinn, as you choose, but no person who has studied the subject cordially can deny that the Prussian soldiers had a sort of relinnee in their own cause as being that of duty and religion, which was callerly wanning amongst the Austrians. The planae Holy Prussia, about which we have in England laughed so often, when it was used by the King, in his addresses to his pospile, had a real meaning for the Prussian pussant. And so the Prussian armice, in my judgment, conquered the Speniards, and the Sederals conquered the Cordentriex,—because they were the Purlans conquered the Cordentriex, because they were nore in carneal, more thoughtful, more willing to risk their lives for a principle, whether faise or true, more imbined with a sense of duty."

TITUAVILLE, October There was less articly manifested in the producing market to-day than there has been for several months past. In all our persuabations throughout the pro-ducing territory we could not learn of a single sale, not tres than heretofore, as buyers predict a still further lecilito in the East, and are disinglined to operate untideclife in the Kas, and are delendined to operate until heldens are willing to yield in proportion to the New York figures, so the views of hugers and sellers are further apart than over. We hope, however, that this will be of short duration, and that before long we may be able to announce a resumption of business.

Latest New York advices report an inactive market with a slight failing off from Saturday's quotations; the cause assigned for this failing off and apparent stagonstion, can only be attributed to the decline in cold, and
